URBAN WATER RATING MAPS

Urban water rating maps have been reviewed, and some minor changes have been made to ensure they reflect existing urban and some transition areas of the District Plan. The changes made also reflect urban growth.

Within the urban water areas, a serviceability charge applies where water supply is available. This charge generally does not apply when a rating unit is being supplied by the network and a water rate is being charged.

Property owners are encouraged to review the maps and put in a submission if they do not agree with their property being included in the urban water rating areas.

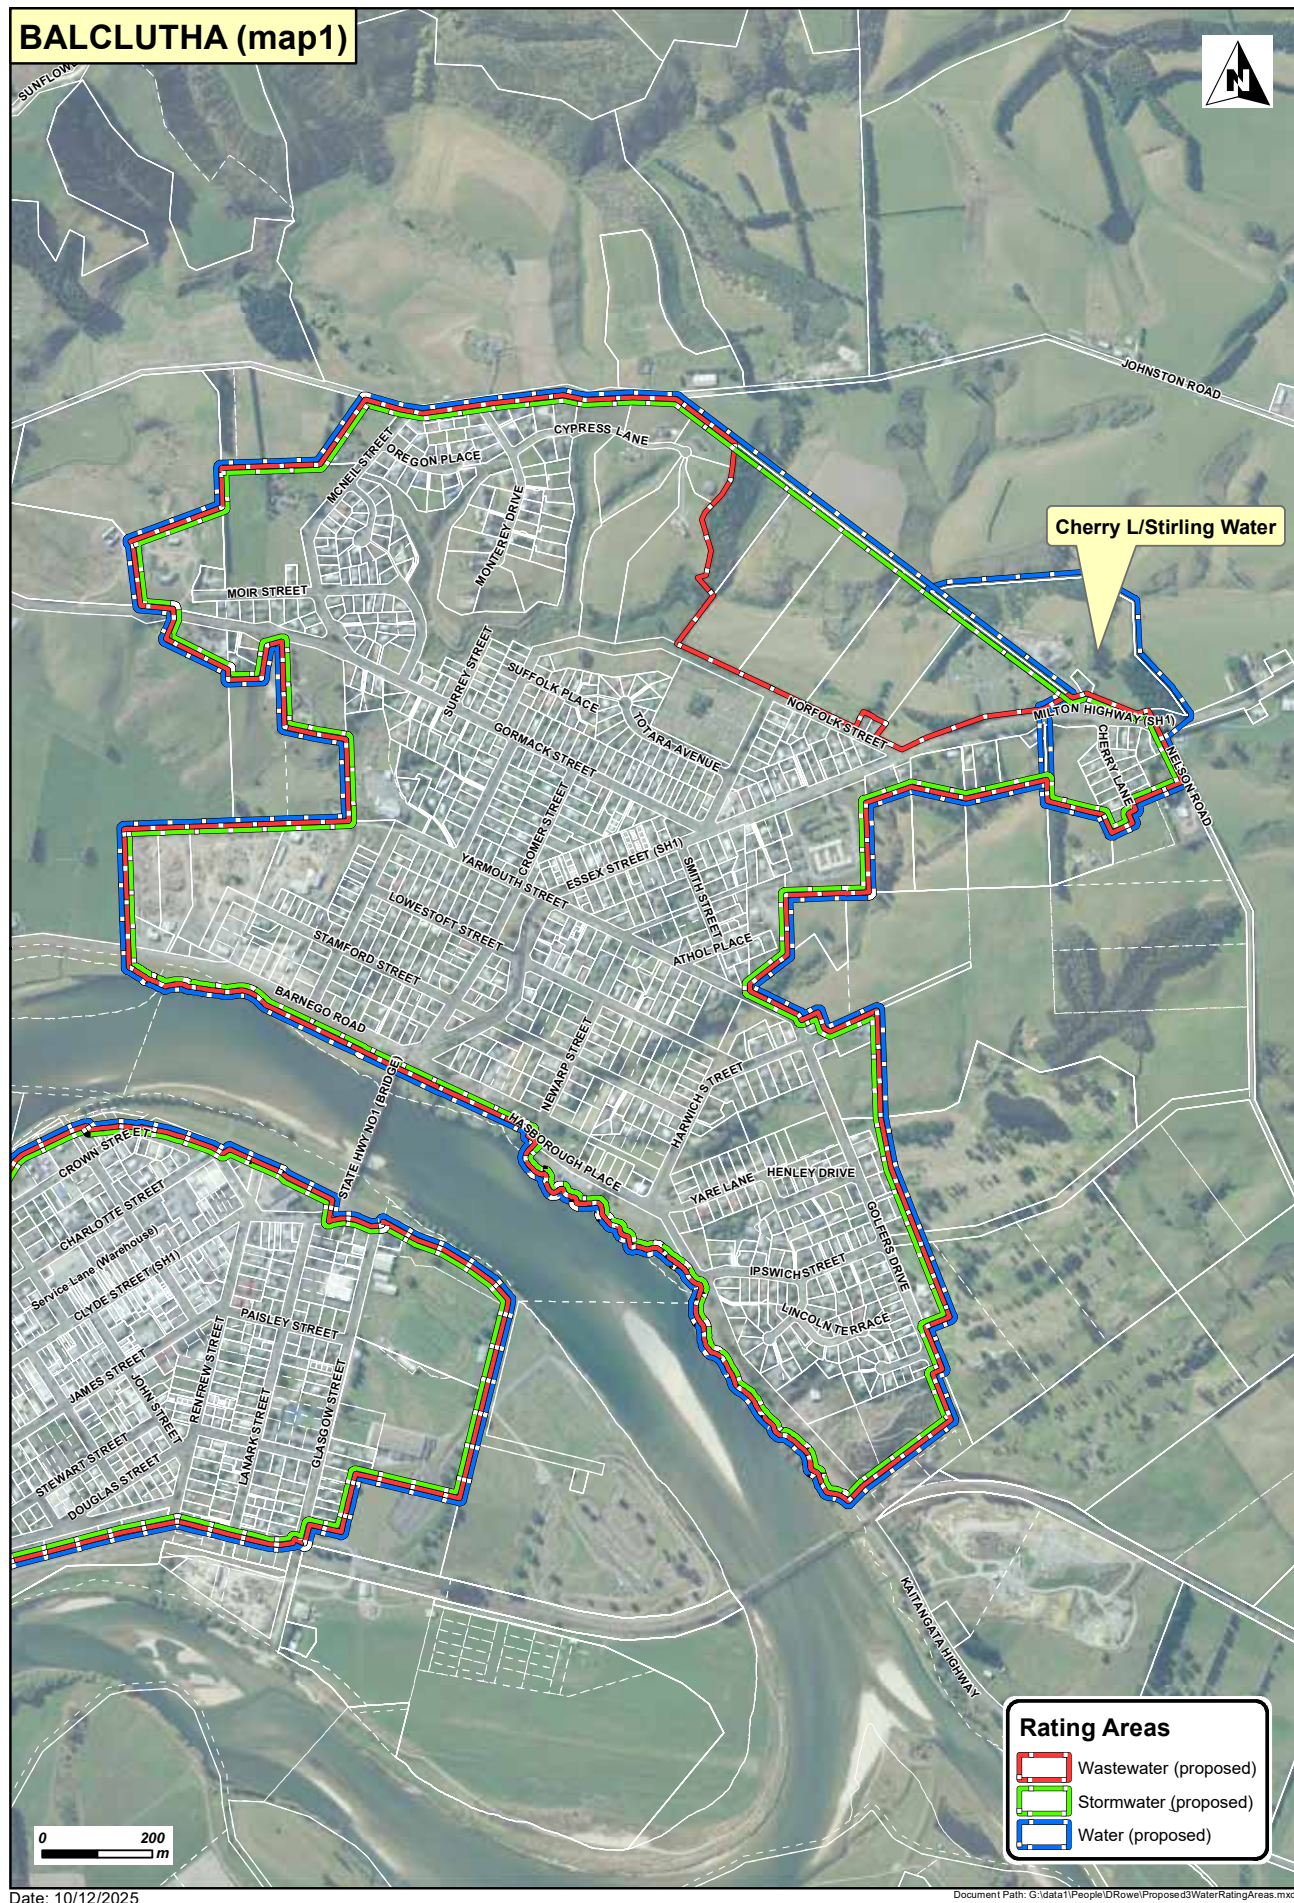

INDEX OF MAPS

THE FOLLOWING MAPS OF URBAN RATING AREAS ARE ATTACHED:

1. Balclutha (North)	Page 3	10. Milton (South/East)	Page 12
